

## **General Public License for use of the Happily Ever After Technology**

### **Background:**

The licenses for most products are designed to take away your freedom to share and change it. By contrast, This General Public License is intended to guarantee your freedom to share and change this technology - to make sure the technology is free for all its users.

The Technology means specifically the items, products and processes required to implement this construction technology. It specifically excludes:

- a) Copyrights of manuals and other publications describing the technology and implementation thereof.
- b) Design calculations used by registered Professional Engineers or other designers to implement a specific application of the Technology.

When we speak of free use of technology, we are referring to freedom, not price. This General Public License is designed to make sure that you have the freedom to use and implement the Technology (and charge for this service if you wish), that you have access to the technology if you want it, that you can change the Technology or use pieces of it in new technologies and applications; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you use the Technology, or if you modify it.

For example, if you use, implement or distribute the Technology, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the Technology. And you must show them these terms so they know their rights.

Also, for your protection and ours, we want to make certain that everyone understands that there is no warranty for the free Technology. If the Technology is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free technology is threatened constantly by other patents. We wish to avoid the danger that users of a free technology will individually obtain patent licenses, in effect making the Technology proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not patented at all.

The precise terms and conditions for use, implementation and modification follow.

## **Terms and Conditions for Use, Implementation and Modification**

1. This License applies to any technology or other work, which contains a notice placed by the inventor saying it may be used under the terms of this General Public License. The "Technology", below, refers to any such technology or work, and a "work based on the Technology" means either the Technology or any derivative work under copyright or patent law: that is to say, a work containing the Technology or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than use, implementation and modification are not covered by this License; they are outside its scope. The act of use of the Technology is not restricted, and the output from the Technology is covered only if its contents constitute a work based on the Technology. Whether that is true depends on what the Technology does.

2. You may use and implement the Technology as you receive it, provided that you conspicuously and appropriately identify with each use an appropriate notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Technology a copy of this License along with the Technology.

You may charge a fee for the physical act of using this Technology, and you may at your option offer warranty protection in exchange for a fee.

3. You may modify your design or implementation of the Technology or any portion of it, thus forming a work based on the Technology, and use and implement and / or distribute such modifications or work under the terms of Section 2 above, provided that you also meet all of these conditions:

- a) You must cause the modified Technology to carry prominent notices stating that you changed the Technology and the date of any change.
- b) You must cause any work that you use or distribute, that in whole or in part contains or is derived from the Technology or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) You must make prominent notice that there is no warranty (or else, saying that you provide a warranty) and that users may utilize the Technology under these conditions.

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Technology, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute or use the same sections as part of a whole which is a work based on the Technology, the distribution or use of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who developed it.

Thus, it is not the intent of this section to claim rights or contest your rights to work developed entirely by you; rather, the intent is to exercise the right to control the distribution or use of derivative or collective works based on the Technology. In addition, mere aggregation of another work not based on the Technology with the Technology (or with a work based on the Technology) does not bring the other work under the scope of this License.

4. You may distribute and use the Technology (or a work based on it, under Section 3) under the terms of Sections 2 and 3 above provided that you also do one of the following:

- a) Notify the user, implementer or customer that the product or use is based on the Technology, and
- b) Make available any drawings, designs, CAD files as available to any third party using or distributing the Technology

The term “drawings, designs, CAD files” means the information on the preferred form of the design. However, as a general rule, drawings, designs, CAD files distributed need not include anything that is normally distributed with the general Technology

5. You may not use, implement, modify, sublicense, or distribute the Technology except as expressly provided under this License. Any attempt otherwise to use, implement, modify, sublicense or distribute the Technology is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

6. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Technology or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Technology (or any work based on the Technology), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Technology or works based on it.

7. Each time you use or redistribute the Technology (or any work based on the Technology), the recipient automatically receives a license from the original licensor to use, distribute or modify the Technology subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

8. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Technology at all. For example, if a patent license would not permit royalty-free redistribution of the

Technology by all those who receive use or implementation directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Technology.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free technology distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of technology distributed through that system in reliance on consistent application of that system; it is up to the designer/donor to decide if he or she is willing to distribute technology through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

9. If the distribution and/or use of the Technology is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Technology under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

10. KELTEC Systems, Inc. or its approved agent may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Technology specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by KELTEC Systems, Inc.

11. If you wish to incorporate parts of the Technology into other free Technologies whose distribution conditions are different, write to the author to ask for permission. For technology that is copyrighted or patented by KELTEC Systems, Inc., write to the KELTEC Systems, Inc.; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free technology and of promoting the sharing and reuse of technology generally.

### **NO WARRANTY**

12. BECAUSE THE TECHNOLOGY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE TECHNOLOGY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE PARTIES PROVIDE THE TECHNOLOGY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR

A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE TECHNOLOGY IS WITH YOU. SHOULD THE TECHNOLOGY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

13. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE TECHNOLOGY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE TECHNOLOGY (INCLUDING BUT NOT LIMITED TO LOSS OF THE CONSTRUCTED BUILDING BEING RENDERED UNUSABLE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE TECHNOLOGY TO OPERATE WITH ANY OTHER TECHNOLOGYS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Technologies

If you modify this Technology, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free technology which everyone can redistribute and change under these terms.

To do so, attach the following notices to the Technology or notify the recipients of the Technology. It is safest to notify them at the start of each project, to most effectively convey the exclusion of warranty.

Notice:

One line to give the Technology's name and a brief idea of what it does. Designer, Year of Modification.

This Technology is free technology; you can redistribute it and/or modify it under the terms of the General Public License as published by KELTEC Systems, Inc.

This Technology is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the General Public License for more details.

You should have received a copy of the General Public License along with this Technology; if not, write to KELTEC Systems, Inc. 346 Hoffman Rd. Bastrop, TX 78602

Also add information on how to contact you by electronic and paper mail.

You should also get your company or your school, if any, to sign a "copyright disclaimer" for the Technology, if necessary. Here is a sample; alter the names:

'MyCompany, Inc.', hereby disclaims all patent interest in the Technology "MyProduct" developed by Joe Designer.

(signature of Ty Coon), 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your Technology into proprietary Technologies.
